INTRODUCTION

- LIFE-DESK is a Digital Life Management System designed to help users manage passwords, Find Nearest Serve, monitor internet speed, track system health, and enhance digital security in one single dashboard.
- It provides a secure, user-friendly, and efficient way to monitor and manage daily digital activities.

WORKING OF LIFE-DESK

User Login Authentication

1

Dashboard loads all modules

2

User selects required feature:

- Password Manager
- Find server
- Speed Test
- System Health

Results shown using graphs & stats

3

Logs and history are stored

4

5

Problems

Slow internet Speed

1

Unorganized Personal Data

2

Users forget multiple Accounts and passwords

3

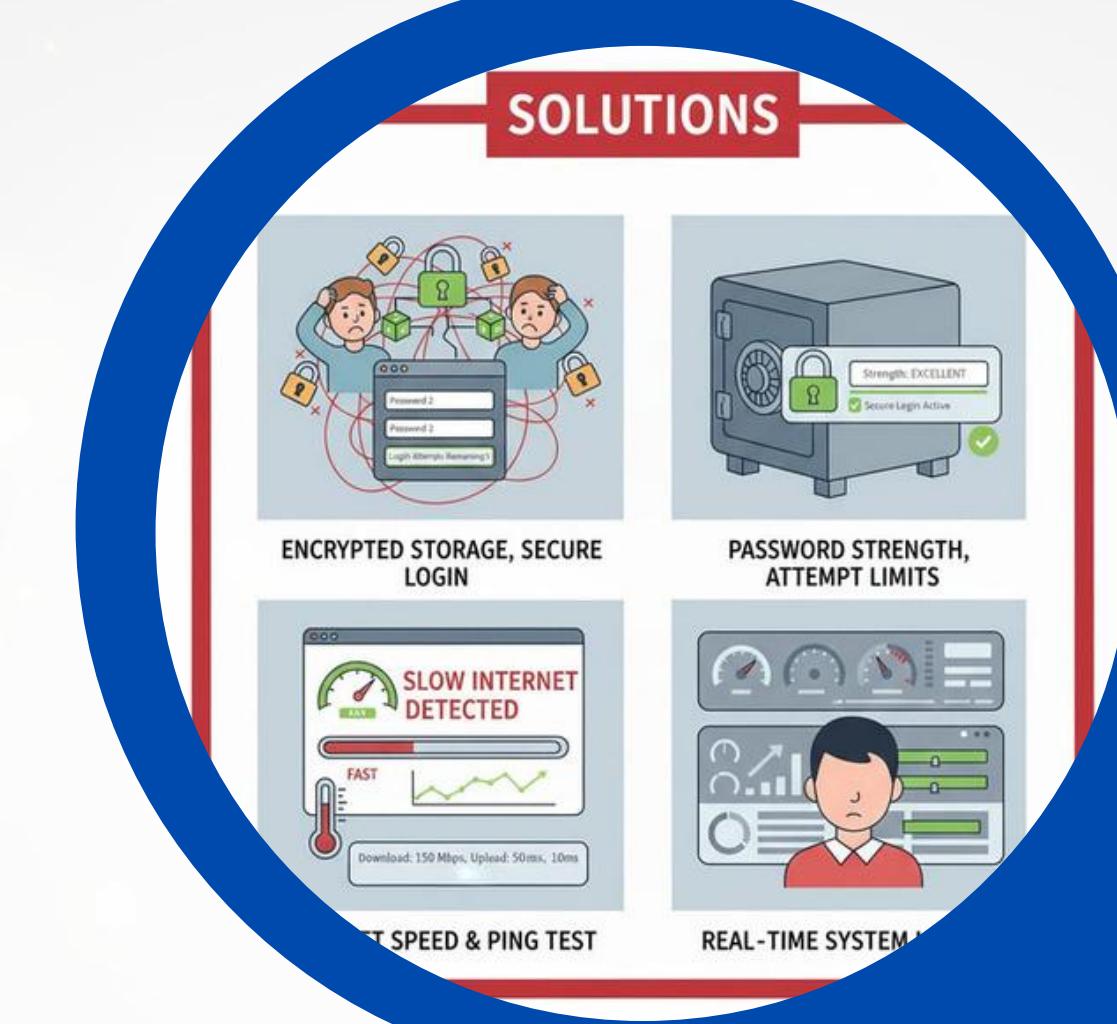

Weak Password Management

4

Limited awareness of system health

5

SOLUTIONS

Solutions

Added an internet speed checker

1

Store passwords securely with hashing

2

Secure login with Multiple Attempts and Recovery

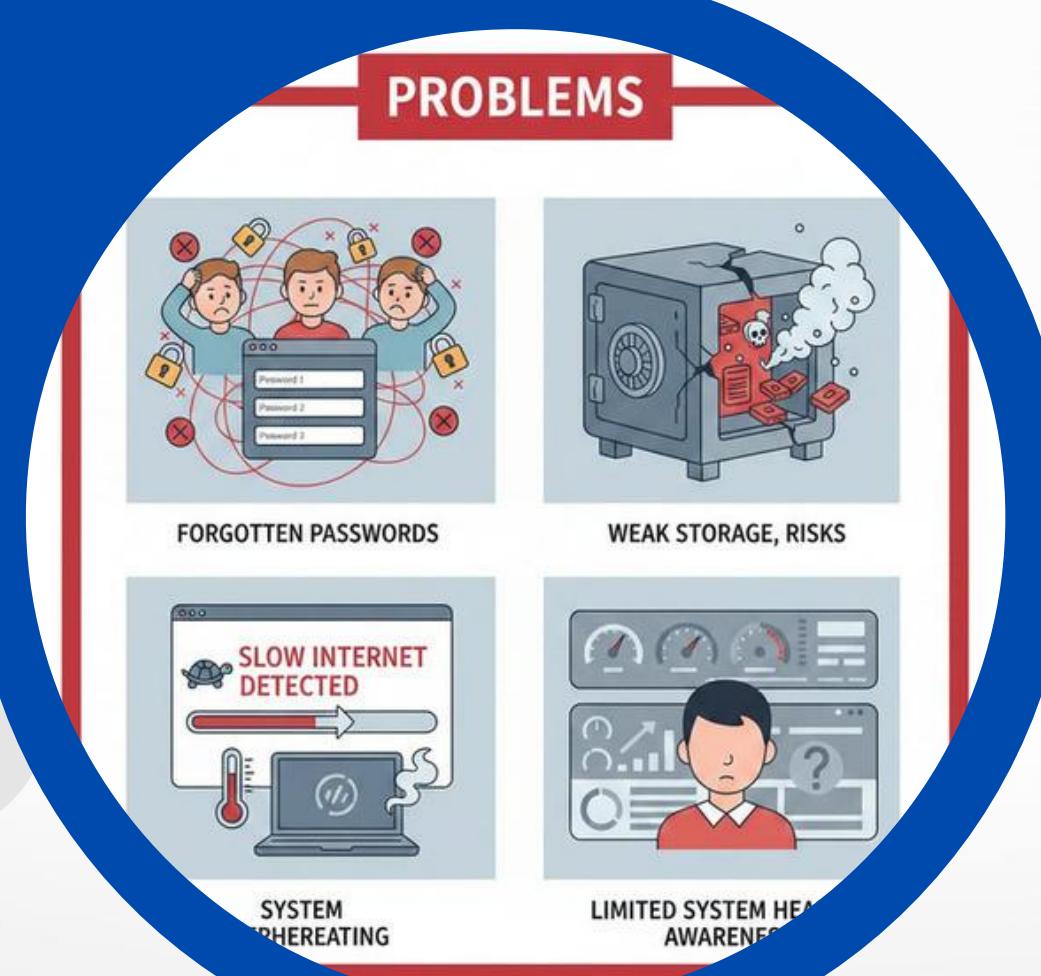

3

Suggest Strong passwords

4

Suggestions on Health of Device and Give it's Info

5

MERITS

- All-in-one digital management
- Secure encrypted storage
- Real-time monitoring
- User-friendly dashboard

DEMERITS

Requires Internet
for Speed Test

Uses Sys
Resources

Requires Regular
Updates

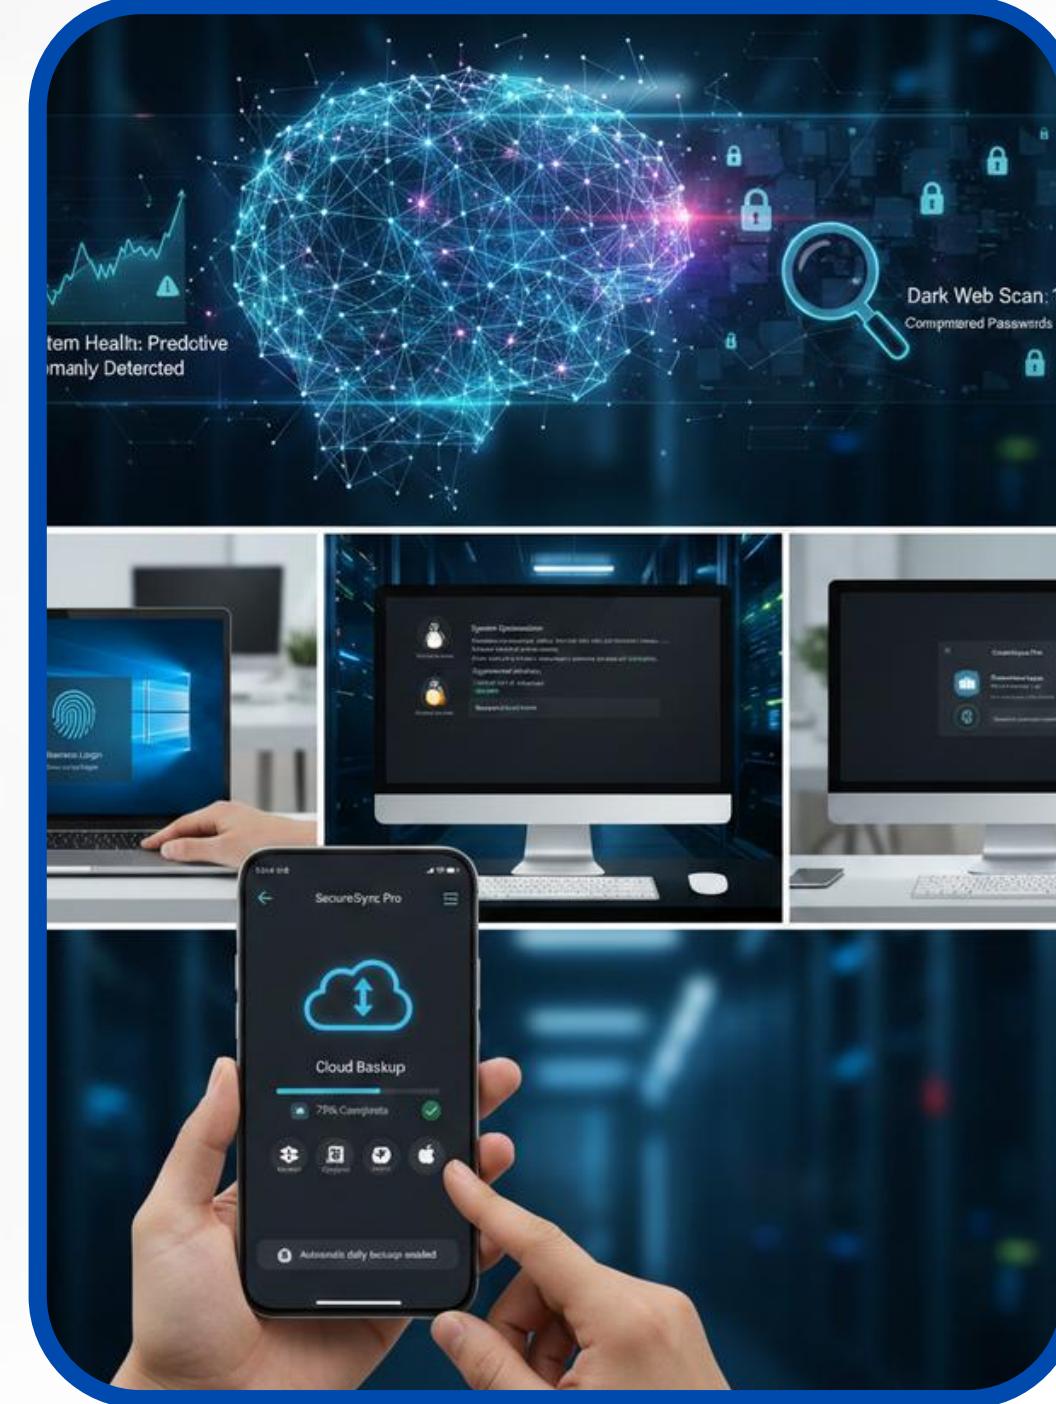

Security Depends
on Master Password
Strength

Demerits

- Security depends on master password strength
- Uses system resources
- No Cloud Integration

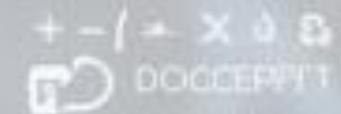

FUTURE SCOPE

- Cross-platform support (Windows, Linux, Mac)
- Automatic system optimization suggestions
- Biometric authentication
- Mobile application version
- Cloud backup integration
